Assembly Guide

**Branch**

# The new way of working you've been waiting for.

Scan here for a digital copy  
of your assembly guide.

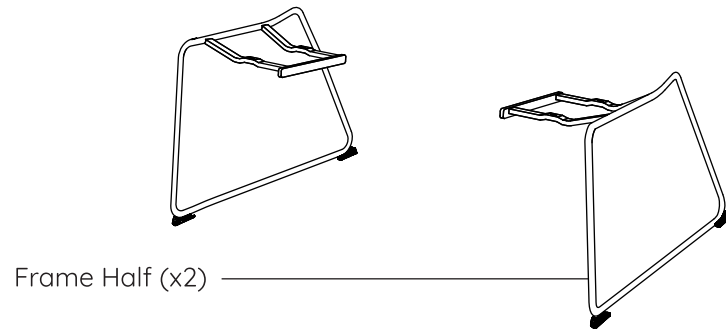

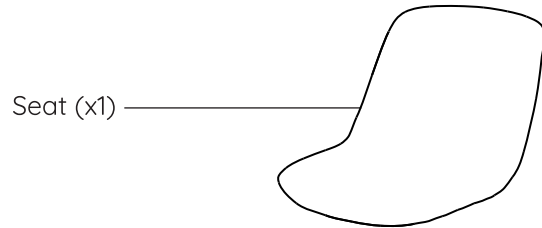

# Caution

- Read this guide fully before assembly and verify all components are present.
- Two-person assembly recommended.
- Do not modify this product or use it beyond its intended purpose as a chair.
- Do not sit on any part of the chair except the Seat.
- Seat only one person at a time.
- Do not use the chair unless all Screws and Bolts are securely tightened.
- Do not use the chair as a step chair, ladder, or on uneven surfaces.
- If parts are missing, broken, or damaged, stop use until Branch replacement parts are received.
- Failure to follow these warnings may result in injury and void the warranty.
- Every six months, check that all Bolts, Screws, and Knobs are securely tightened.
- Keep this manual for future reference.

# Components

## Included Hardware

M6x16mm Screws (x5)

M6x40mm Screws (x3)

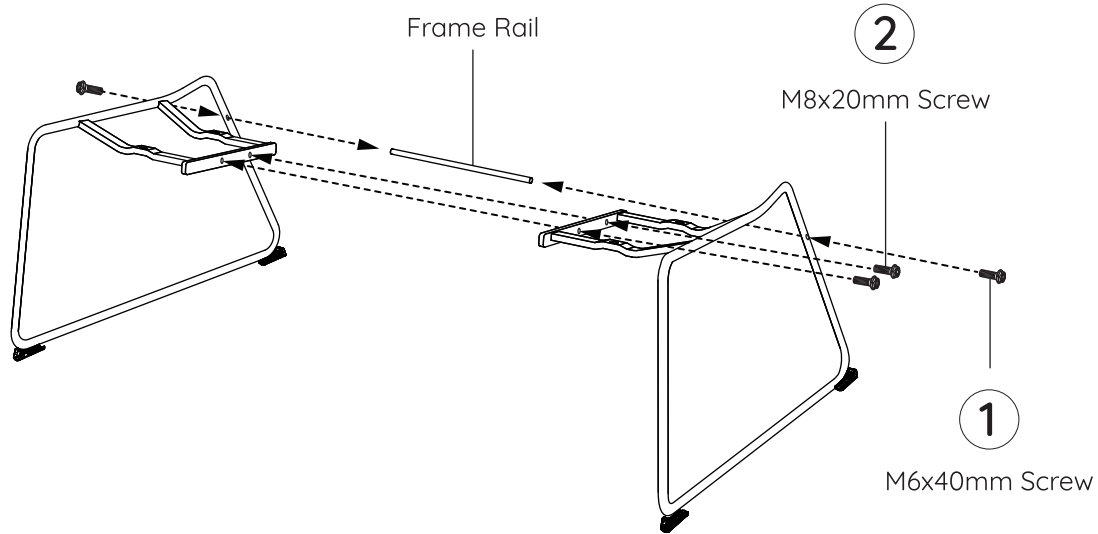

M8x20mm Screws (x3)

Allen Key (x1)

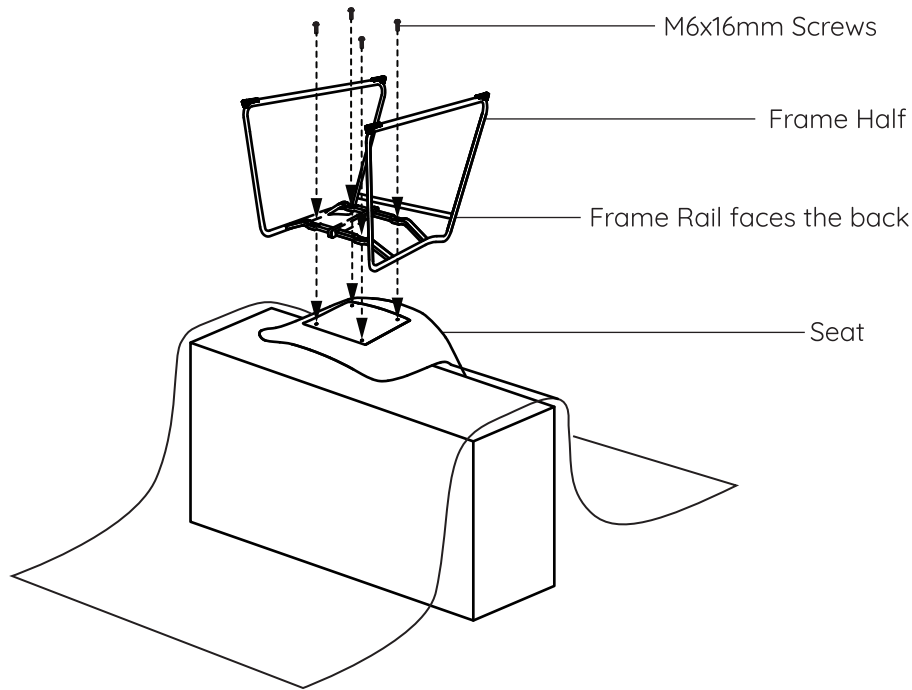

# 1

Place the **Frame Halves** (x2) on a clean and flat surface. Position the **Frame Rail** (x1) between the **Frame Halves**, aligning the screw holes. Insert **M6x40mm Screws** (x2). Do not fully tighten the screws yet.

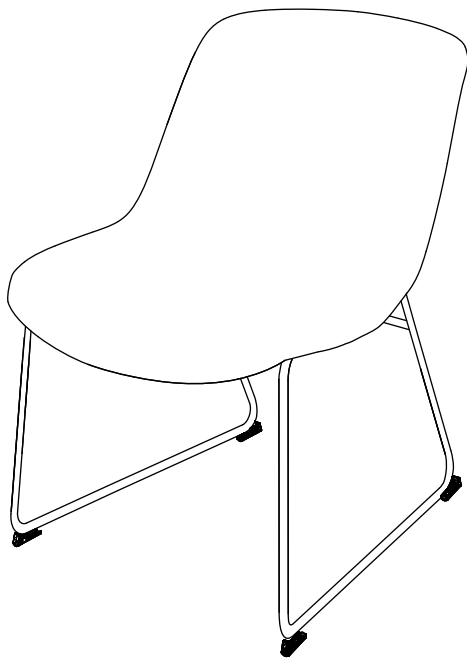

Next, align the screw holes and connect the **Frame Halves** using the **M8x20mm Screws** (x2). Hand-tighten first, ensuring that all 4 feet are on the ground. Once the frame is level, use the **Allen Key** (x1) to fully tighten the **Frame Rail** first, followed by the **Frame Halves**. Set the assembled base aside.

# 2

Place the shipping box flat and cover it with the included plastic or a blanket to prevent dirt from staining the chair or your clothing. Place the **Seat** (x1) upside-down on the box. Next, position the **Frame Half** assembly over the **Seat**. The **Frame Rail** should face the back of the **Seat**. Align the mounting holes and insert **M6x16mm Screws** (x4). Tighten with the **Allen Key** (x1).

# 3

Carefully turn the assembled chair upright. Press down gently on the seat to ensure all connections are secure.

# All Done!

Go ahead, try it out. You may experience what we call an “ahhh” sensation. That’s completely normal. You’re now well equipped for whatever the workday throws at you.

Now, don’t be shy. Show us how it looks!

# FAQ & Troubleshooting

## Issue

## Answer

---

My chair feels loose after assembly. What should I do?

Ensure all screws are tightened securely. Recheck and retighten every six months.

---

Can the chair be used on different types of flooring?

Yes. It is designed for use on both carpet and hard floors. For hardwood or delicate surfaces, use a protective floor mat to avoid scratches.
